DETAILED ACTION

Examiner's Amendment/Comment

The title of the invention is not descriptive. In accordance to MPEP 606.01, the title has been changed to read:

A MULTI-PROCESSOR SYSTEM THAT IDENTIFIES A FAILED NODE BASED ON STATUS INFORMATION RECEIVED FROM SERVICE PROCESSORS IN A PARTITION

The drawings are objected to because Figure 8 has minor informalities. Please change "ACORRESPONDING" to "A CORRESPONDING" (see first step), "OFFER" to "OTHER" (see third step), "PATITION" to "PARTITION" (see third step), and "RERCOVERY" to "RECOVER" (see last step). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Examiner's Statement of Reason for Allowance

Claims 1-9 are allowable over the prior art of records.

The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 1 and 9 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts.

The primary reason for allowance for claim 1 is the inclusion of said other nodes transmit said failure information to respective said service processors, which prepare second status information based on error log information of said other nodes and transmit said second status information to said service processor manager; and said service processor manager identifies a location of said failed node based on said first and second status information to indicate said service processors in said partition to recover from said failure in conjunction with the rest of the limitation set forth in the claim.

The primary reason for allowance for claim 9 is the inclusion of transmitting said failure information from said other nodes to respective said service processors, thereby allowing said service processors to prepare second status information based on error log information of said other nodes and transmit said second status information to said service processor manager; and allowing said service processor manager to identify a location of said failed node based on said

first and second status information and indicate said service processors in said partition to recover from said failure in conjunction with the rest of the limitation set forth in the claim.

The remaining claims, not specifically mentioned, are allowed because they are dependent upon one of the claim mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
